Claims 1-7 and 48-54 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the macrolide of Formula II, L representing a group of Formula VA or VB and S representing a group of formula X, does not reasonably provide enablement for M being a macrolide, S being any steroidal anti-inflammatory subunit and L being any linker. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. Applicant has failed to provide any evidence that macrolides other than azithromycin derivatives of Formula II and linker molecules of Formulas VA or VB result in compounds having a desired activity. Note that the terms "macrolide" and "linker molecule" encompass such a large number of compounds of diverse structural formulas that it would take an undue amount of experimentation to determine which specific compounds will possess the desired activity.

Claims 8-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 8-47 are improper in that a period is missing at the end of the claims.

Claim 48 is improper in that variables M, L and S have not been defined.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1623

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-54 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-52 of copending Application No. 10/616,046. Although the conflicting claims are not identical, they are not patentably distinct from each other because the compounds of the instant application are encompassed by the compounds of the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by the International Patent No. WO 97/41255.

The International Patent discloses the claimed compound wherein a macrolide is linked to a steroidal subunit (see, for example, Fig.7B)
